BAKED & BATTERED IS GLUTEN-WISE!

We've worked hard to develop many beautiful and delicious items without the use of wheat-gluten to accommodate those with gluten sensitivities.

HOWEVER: all of our baking and cooking occurs in a kitchen where wheat is used in our other traditional recipes. The same is true of our fish & chips. While we do our level best to keep ingredients and utensils separate, cross-contamination is bound to occur. If you suffer from a serious gluten-related sensitivity such as Celiac Disease, or are someone who, say, can't share a toaster with someone who eats wheat bread, then you may want to steer clear!

THE BAKERY/CAFE

Be sure to check out Baked & Battered's Cottage Bakery for delicious, from-scratch baked items. Set in a cottage-themed café with a beautiful view of Head Lake, we offer a large selection of scrumptious pastry. You may even, occasionally, stumble upon something special in the case dreamed up that day by one of our talented bakers!

We hope you enjoy our products. We use organic flours whenever possible and often substitute light spelt for wheat. We never use high-fructose corn syrup, artificial ingredients, or preservatives. We offer several gluten-wise items for the gluten-sensitive or those simply watching their gluten-intake.

We approach our daily bakes carefully to avoid excessive end-of-day waste. This means that when our bakery case is empty, well ... it's empty till the next day's big bake!
